Dear Genius Sports Hiring Team,

I am thrilled to submit my application for the software engineering opportunity at Genius Sports, as advertised. With my upcoming graduation from the University of California, Berkeley, with a degree in Electrical Engineering and Computer Science, I am keen on leveraging my skills and experiences to contribute to your mission of fostering a sustainable sports data ecosystem.

During my tenure at UC Berkeley, I have honed my skills in database management and algorithms, aligning perfectly with Genius Sports' emphasis on data management and fan engagement. My role as a Software Engineer Intern at HrHouz allowed me to work on optimizing resume matching processes using advanced techniques like cosine similarity vector search, akin to managing and utilizing sports data for enhanced fan experiences. This role emphasized the importance of accuracy and efficiency, fundamentals I know are crucial to supporting Genius Sports' innovative approach to data solutions.

Being involved in leadership roles, such as President of Google Developers at DVC and Senior Mentor in Computer Science Mentors, has ingrained in me the values of collaboration and inclusivity. I appreciate Genius Sports' focus on these values to empower employees and foster a diverse environment. Furthermore, my work as a Head Teaching Assistant for CS61A has refined my communication skills, essential for building trust and credibility with global partners.

I am very excited about the opportunity to contribute to and learn from a forward-thinking team at Genius Sports, where inclusivity, collaboration, and trust are at the core of innovation. I look forward to the possibility of discussing how my background, skills, and enthusiasms align with the goals of your company.

Thank you for your time and consideration.

Sincerely,

Ronald Arifin
