Dear Build Out Hiring Team,

I am writing to express my enthusiasm for the Software Engineer position at Build Out, as advertised. With my solid foundation in Electrical Engineering and Computer Science from UC Berkeley and diverse experiences across various tech roles, I am eager to contribute my skills to your innovative team.

During my internship at HrHouz, I developed a ranking service and improved resume matching systems, demonstrating my ability to enhance product offerings through optimized data processing techniques. This experience refined my database management skills, which I am eager to apply at Build Out to drive data-driven solutions and efficiencies. Furthermore, my contract work at Skygeni, where I crafted an LLM chatbot, showcases my ability to integrate advanced technology, aligning with Build Out's commitment to harnessing emerging tech for business improvements.

In addition to my technical skills, I have a strong track record in leadership and mentoring through roles such as Head Teaching Assistant for CS61A at UC Berkeley. This role honed my communication abilities and reinforced my passion for fostering collaborative, innovative environments-a core ethos I understand is embraced at Build Out.

I am particularly drawn to Build Out's culture of innovation and its focus on impactful tech solutions, values that resonate with my career aspirations. I am eager to bring my expertise in software engineering and passion for advancing tech to your team. Thank you for considering my application; I look forward to the opportunity to discuss how I can contribute to Build Out.

Sincerely,

Ronald Arifin
