Dear Genius Sports Hiring Team,

I am writing to express my enthusiasm for the opportunity to join Genius Sports as a Software Engineer. With a strong educational foundation in Electrical Engineering and Computer Science from the University of California, Berkeley, and extensive experience in software development, I am excited to contribute to your mission of enhancing the sports data ecosystem. As someone who thrives in collaborative environments, I am drawn to Genius Sports' commitment to diversity, inclusivity, and innovation.

During my time at UC Berkeley, I have honed my skills in cloud computing as the Lead Engineer for Cloud Computing at Cal and demonstrated leadership as President of Google Developers at DVC. These roles have equipped me with the technical acumen and communication skills essential for driving change within a team-oriented setting. Moreover, my internship at HrHouz, where I worked on optimizing data management processes, parallels Genius Sports' goal of empowering sports with more efficient data collection and utilization.

I am particularly excited about the prospect of engaging fans through innovative technology. My project, StudySuite, which won at the Stanford Hackathon, reflects my passion for using technology to enhance engagement and deliver unique user experiences. Similarly, my work with Skygeni involved enhancing user engagement, aligning with Genius Sports' vision of connecting with fans and brands through live data.

I am eager to bring my expertise and passion for technology to Genius Sports, helping to push boundaries in creating a sustainable data ecosystem that benefits all stakeholders. Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Ronald Arifin
